PROFILE

Internet Engineering student at Universitas Gadjah Mada with hands-on experience in cloud infrastructure, network engineering, and Linux system administration. MTCNA, MTCRE, and BNSP Junior Technical Support certified, with practical experience in AWS, MikroTik, Ubuntu Server, Kubernetes, Nginx, MySQL, and VPS deployment through technical projects and competitions.

EDUCATION

Universitas Gadjah Mada 2024 – Present

Bachelor of Applied Science in Internet Engineering (GPA: 3.92)

- Field: Network Engineering, System Administration, Cyber Security, Cloud Computing, Artificial Intelligence, Internet of Things

SMK Negeri 2 Wonosari 2021 – 2024

Computer Network & Telecommunications (Final Grade: 88.75)

- Field: Network Engineering, System Administration, Cloud Computing, Internet of Things

TRAINING & CERTIFICATION

AWS re/Start Batch 15 | Orbit Future Academy Aug 2026 – Sep 2026

MikroTik Certified Routing Engineer (MTCRE) | MikroTik Issued Jul 2025

MikroTik Certified Network Associate (MTCNA) | MikroTik Issued Jul 2025

Junior Technical Support | Badan Nasional Sertifikasi Profesi (BNSP) Issued Jul 2024

WORK & INTERNSHIP EXPERIENCE

Departemen Teknik Elektro dan Informatika SV UGM Jul 2026 – Present

IT Service Intern

- Managed and maintained the official Internet Engineering program website (tri.sv.ugm.ac.id) to support accessible information for students, lecturers, and staff.
- Organized and maintained digital documentation and departmental information assets to improve accessibility and support ongoing administrative and communication activities.

PT Waterpedia Rejeki Langit May 2024 – Aug 2024

Digital Marketing & Web Developer Staff

- Developed and managed 3 WordPress-based product websites, structuring pages and content to strengthen the company's online presence and support product promotion.
- Produced and published 100+ SEO-optimized articles using keyword research and on-page optimization to improve website visibility and organic search performance.

CV Rumah Mesin Jul 2023 – Nov 2023

SEO Specialist & Copywriter Intern

- Produced SEO-optimized articles of 2,000+ words for digital marketing campaigns, aligning content with target keywords and product-related search intent.
- Conducted keyword research, competitor analysis, and on-page SEO optimization to improve content relevance and search-engine discoverability.

PROJECT EXPERIENCE

PMLD Smart Agro Melon 2026

Backend Programmer

- Developed the Laravel backend for greenhouse monitoring, covering sensor readings, threshold alerts, virtual device control, and reporting APIs.
- Deployed and configured the application on a VPS using Ubuntu Server, Nginx, and MySQL, enabling remote access, application hosting, and testing in a server environment.

BoxGuardAI: AI-Based Packaging Quality Control System

2026

Backend Developer

- Built a Kubernetes-based server environment using containerd and Flannel to deploy the Apache web dashboard and supporting services.
- Integrated IoT data communication using MQTT through HiveMQ with backend API and MQTT subscriber services, enabling real-time packaging inspection data to be transmitted and processed by the server.

Smart Parking System with ANPR using ESP32-CAM

2025

Hardware Programmer

- Developed ESP32-based parking hardware integrating IR and ultrasonic sensors with gate-control components to detect parking availability and automate vehicle access.
- Implemented MQTT communication through HiveMQ Cloud to transmit parking data from ESP32 devices to a Node.js server for centralized processing.
- Integrated the CircuitDigest ANPR API for automatic license plate recognition, enabling detected vehicle plates to be processed as part of the parking access workflow.

LEADERSHIP & ORGANIZATION

Komunitas Mahasiswa TIK (KOMATIK) UGM

Dec 2025 – Present

Head of IoT GAMA Division

- Lead technical learning activities and hands-on IoT projects, covering embedded systems, sensors, device integration, and MQTT communication.
- Coordinate division members, learning plans, and collaborative projects to support practical IoT skill development.

FORKOMTRI SV UGM

Jun 2025 – Jun 2026

Vice Head of Public Relation Division

- Coordinated internal and external communication to support organizational programs and information distribution.
- Managed content publication and collaborate with division members to maintain clear and consistent organizational communication.

National Networking Competition (NETCOMP) 4.0 UGM

Dec 2025 – Feb 2026

Vice President

- Coordinated internal communication and cross-division collaboration, including task delegation, timeline development, and progress monitoring to support efficient event operations.
- Managed end-to-end execution planning for networking competitions and seminars, supporting strategic decision-making and maintaining committee coordination from preparation through event implementation.

ACHIEVEMENTS

3rd Place – Lomba Kompetensi Siswa SMK DIY Cloud Computing

2024

- Built and deployed AWS-based application infrastructure involving containerization, ECR/ECS Fargate, RDS, EFS, and supporting AWS services for scalable application deployment.

2nd Place – Lomba Kompetensi Siswa SMK DIY Cloud Computing

2023

- Deployed a Laravel application on AWS EC2 with RDS, EFS, S3, KMS, SQS, ElastiCache, Load Balancer, and Auto Scaling to support scalable and fault-tolerant infrastructure.

TECHNICAL SKILLS

Networking: Routing & Switching, MikroTik RouterOS, LAN/WAN, MQTT

Backend & Data: Laravel, PHP, MySQL, Node.js, REST APIs

Programming: Python, C++, JavaScript, HTML, CSS, Bash

Cloud & Infrastructure: AWS, Linux, Ubuntu Server, Kubernetes, Nginx, Apache, VPS, VirtualBox, Server Administration

LANGUAGE

Indonesian: Native Speaker

English: Intermediate
